Professional Profile

Alan has over 20 years’ experience in the Transport industry across the UK and Australia. His strength and passion is in bus, interchange and town centre land use planning which he has excellent knowledge of having been extensively involved in Transport for London’s (TfL’s) London Bus Initiative program, the RMS Sydney Strategic Bus Corridor program, the TfNSW Transport Access program and many town centre transport & land use studies.

Alan established PeopleTrans in 2012 with a view to improving the quality of people’s lives through excellence in Transport Planning and Engineering and has continued in the areas of bus and interchange planning recently completing work on Strategic Bus Corridor 16 for RMS and currently assisting Transport

for New South Wales on the Transport Access Program. Alan's reputation in the field of bus planning and operations is regarded highly within the industry.

Alan has acted as a project director and in many cases project managed a number of the public and private sector transport planning and engineering commissions in Sydney with most of these projects requiring the need to present the project outcomes to private and public sector clients as well as the community.

A selection of projects undertaken by Alan Stewart are provided below.
